Objective

Skilled in data analysis, machine learning, and AI-driven solutions with expertise in Python (Pandas, NumPy, Matplotlib, Seaborn, Plotly) and SQL. Experienced in data visualization (Power BI), predictive modeling, and cybersecurity analytics. Proficient in deploying ML models, working with large datasets (Kaggle), and implementing data-driven insights. Strong foundation in database management (MySQL, PL/SQL) and cloud computing (AWS). Passionate about leveraging data science to solve real-world problems efficiently.

Education

Post Diploma Certificate in Data Analytics integrated with Artificial Intelligence

SAIT
2026-2028

B.Tech, Computer Science & Engineering

DAV University, Jalandhar
2021 – 2025
Percentage: 92.00%

Senior Secondary(XII)CBSE

Kendriya Vidyalaya, Nangal Bhur
2019 – 2020
Percentage: 80%

Key Skills

Data Science
Data Analytics
Power BI

Communication
Problem-solving
Ms Excel

Training

I underwent comprehensive training in Data Science, Python Programming, SQL, and Cybersecurity during June–July 2023. At O7 Services, I worked with large datasets, performing data preprocessing, EDA, and implementing machine learning algorithms using Python, while also deploying models with Streamlit. At NetMax Technologies, I mastered core Python, GUI development with Tkinter, and database operations using SQL and tools like XAMPP. In cybersecurity, I gained hands-on experience with tools like Wireshark and Metasploit, learning penetration testing, cryptography, and network security practices.

JUNE 2024 – September 2024

Data Science and ML

| O7 Services | Jalandhar

JUNE 2023 – JULY 2023

Python Programming & SQL

| NetMax Technologies | Chandigarh

JAN 2025 – FEB 2025

Data Analytics | Infosys Springboard

| Virtual

INTERNSHIP

Data Science Intern | Agratas Edutech | Remote

Successfully completed a Data Science internship focused on real-world applications, involving data preprocessing, model development, and insights generation. Received a Certificate of Completion along with a Letter of Recommendation for outstanding performance and contribution.

PROJECT

FitGenie | [Live App](#)

A smart health and nutrition analysis app built using machine learning and data science.

FitGenie enables users to upload food images, which are analyzed using Google Generative AI to extract nutritional information.

AI Cyber Vanguard App | [Live App](#)

A comprehensive cybersecurity threat detection system leveraging ML and data science for real-time protection.

Excel Dashboard | [Visit Dashboard](#)

Developed a dynamic Excel dashboard for data analysis and reporting, integrating key data science concepts to generate actionable insights. This project strengthened my skills in data visualization, pivot tables, charts, and effective data storytelling for business decision-making.

Power BI Dashboard | [Live Demo](#)

Created a multi-page interactive dashboard in Power BI, visualizing store performance, customer behavior, product trends, and revenue insights. This project demonstrates the ability to transform raw data into strategic visual analytics for business intelligence and decision-making.

Honors & awards

The Brainiacs

Issued by Institution's Innovation Council, DAV University · Feb 2023
